

Software Engineer (Front End) (f/m/x)

How about joining our growing team and our mission: Helping researchers to find new treatment methods by providing them with the software they need? Our team is expanding and there is a lot to learn, discover and contribute:

- Develop and improve our web applications and contribute to existing open source software
- Work on applications, which support researchers in improving the treatment of patients
- Get in touch with the latest technologies/concepts like Kubernetes and GraphQL
- Help to shape the product by bringing in new ideas for features and usage of technologies

Who we are looking for

- Excellent programming skills in JavaScript/TypeScript
- You are a team player who loves to share knowledge and ideas with your colleagues
- Experience in React or a similar UI framework
- Previous experience in contributing to open source software projects would also be a plus
- At least 2 years of relevant experience, however fresh Computer Science graduates will also be considered
- Strong analytical skills
- Fluency in English
- Based in Singapore

Why you will love working with us

- A broad network of Digital Health Experts which enables you to meet the leading minds of the field
- A highly motivated team out of more than 30 countries which works with joy on the shared mission
- Space for your ideas and plenty of participation opportunities - Data4Life develops through the contribution of all employees
- Besides a competitive salary (including a budget for your individual continuing education and a financial contribution to your gym membership) we offer you flexible working hours and regular home office days
- A secure funding which enables you a long time perspective with us
- Warm and helpful colleagues who will welcome you to the team with open hearts

About us

Data4Life is a nonprofit digital health organization, generously funded by the Hasso Plattner Foundation. We believe it's possible to have a meaningful impact on healthcare by integrating technology, data, and science. Our digital solutions are designed to improve health and quality of life for people throughout the world. Data4Life has employees from over 30 nations who are working together at our offices in Potsdam, Berlin, Barcelona, and Singapore. Our diverse team is made up of experts from several fields, including product development, technical engineering, data security, and medicine.
